

Three Phase
KVA (75-5000)

Parts Super Center has access to the complete technical records on all Padmount transformers manufactured from 1970 to today.

Our replacement unit will match all electrical specifications & dimensions of the original unit.

PSC Retrofit / Replacement Unit

- ✓ Same rating as the original GE unit
- ✓ PSC can meet critical aspects of the original unit design and can also provide new accessories which lead to overall improved efficiency & additional cost savings

Engineered & Manufactured to FIT

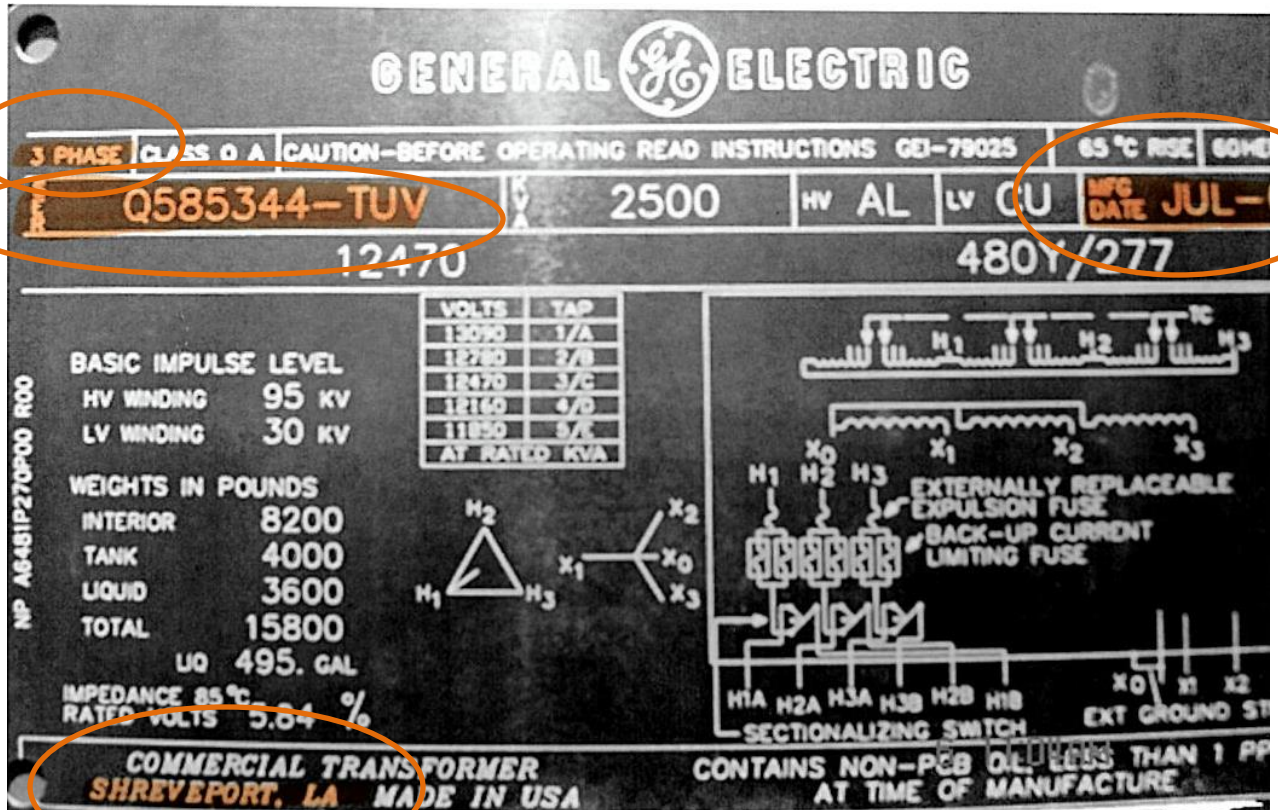

- ✓ PSC's quote includes losses average and other critical specifications to ensure your new transformer will meet or exceed original design.
- ✓ PSC can also add new accessories not included in the original specs
- ✓ Meets the Buy America Act!

Single Phase
KVA (10-167)

Flip over this sheet to find out what information we need from the nameplate to get started!

All we need to get started is the nameplate information from the existing unit!

Highlighted sections contain the information we need in order to provide you with a replacement Padmount transformer.
